We’re becoming proficient in XD

`v`	regular selection tool
`r`	rectangle
`e`	ellipse (aka circle/oval)
`l`	line
`t`	text
`a`	artboard
`cmd + g`	group (select a few elements)
`alt + drag`	copies and starts moving copied element
`cmd + r`	repeat grid
`cmd + z`	undo (go back)
`cmd + shift + z`	redo (go forward)

same tbh -- we love dissenting opinions (from hwk 5)

Feedback

- *On a scale from 1 to 10, how much did you enjoy reading this article? If you scored below a five, please briefly explain why.*

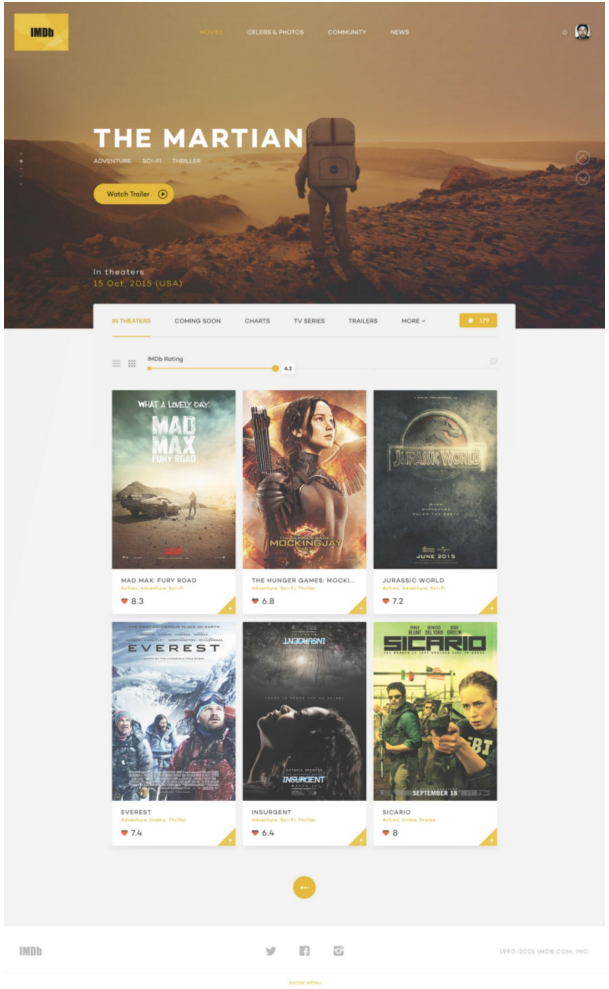
  1. I'm honestly not as interested in the artsy side of front end. As much as I know that it is essential, it is honestly just my least favorite part. That is okay though. I'm sure I will grow to like it in time. It is just different then what I am used to.

Rapid Prototyping

Rapid prototyping allows you to create digital mockups ***quickly.***

Start with sketches, end with a prototype.

Use tools like Adobe XD, Figma, Sketch, etc. to create designs.



IMDB Redesign

Three things you'll learn today

1). Modularizing your designs via Grid Tool and Symbols

Three things you'll learn today

2). Be able to look at UI analytically
and be mechanically
skilled to recreate them.

Three things you'll learn today

3). Gain more confidence in your proficiency as a designer, regardless of your background
